Henry Luft Dies in Calgary Hospital

Henry Luft, 58, 209 7th St. N.E., Calgary, died in the hospital on Friday, May 27. He was born in Saratov, Russia, and came to Canada from 1904 to 1914. He farmed at Didsbury for one year and at Carbon for 33 years, returning to Calgary in 1948. He was a member of the Moravian church.

He is survived by his wife, Maria; three daughters, Mrs. H.J. Gimbel, Carbon; Mrs. Herbert Hehr, and Mrs. Fred Eberle; two sons, Victor, Carl, and Carl Carstairs; four brothers, John, Botterill, Alex, Philip and Victor of Didsbury; three sisters, Mrs. Alex Burton, Langdon; Mrs. Harry Gerlich, Carbon; Mrs. John Lund, Didsbury; and seven grandchildren. Services were held Monday, May 31, at 2 p.m. Interment followed in the Union cemetery with Jacques funeral home in charge of arrangements.

CARBON WINS FIRST TWO BALL GAMES IN NEW LEAGUE

In their first two encounters of the newly-formed five-team baseball league the Carbon Athletics emerged undefeated with two easy wins. On May 22, Carbon beat the Granger 9-6 in eight innings of play. On Sunday, May 29 the Athletics defeated Birchen on their own diamond to give them a 100% record. The one losing game was far from errorless. Carbon had a total of four home runs and numerous singles, doubles and triples. The Athletics played the Bow River Athletics on Thursday in an exhibition game and again Carbon emerged victors by a 9-3 score in seven innings.

WILLIAM D. McDONALD
Liberal candidate for the Bow River constituency who was nominated at a recent convention held at Belseker.

WEDDINGS

DOLPHIN — HANSON

Knox United Church, Drumheller, was the scene of a quiet wedding on May 4, when Evelyn Lois Hanson, eldest daughter of Mr. and Mrs. Gordon Hanson, became the bride of William Henry Dolphin, eldest son of Mr. H. Dolphin of Carbon. Rev. A. Edworthy officiated at the ceremony.

Given in marriage by her father, the bride wore a grey gabardine suit with pink accessories and a corsage of pink roses. Dorothy Hanson, sister of the bride, was bridesmaid and wore a sunburst patterned wine, white accessories, and a corsage of yellow roses tipped with fuschia.

Mr. Thomas Dixon acted as best man, and the ushers were Gordon Hanson and Walter Bojza.

Miss Freda Noffin sang "I Love You Truly" during the signing of the register.

On this occasion the bride's mother chose a beige suit with black accessories and a corsage of American beauty roses. Mrs. Steven, sister of the groom, wore a grey dressmaker suit with pink and black accessories and pink carnations.

Following a reception held at the South Credit Hall the couple left for a honeymoon in Calgary. On their return they will take up residence in Drumheller.

Hesketh and Sharples

Orkney entertained the Grand Forks ball team on Wednesday evening and won by a score of 4-2.

Grand Forks played host to Okanagan Sunday afternoon and won 12-6.

A dance sponsored by the Grand Forks ball club will be held in the Hesketh Hall on Saturday, June 10, proceeds will go toward the building of a refreshment booth for the sports on Wednesday, June 22.

Fire destroyed a garage belonging to the son of L.H. Saunders Saturday evening. Cause of the blaze is unknown. With the help of neighbors and fire fighters from Carbon the blaze was brought under control before any damage was inflicted on the house or other buildings.

RALPH ATKINSON HONORED BY ENGINEERING FRATERNITY

Two Alberta petroleum engineering students have been accepted for membership in Pi Epsilon Tau, honorary petroleum engineering fraternity.

They are Ralph Atkinson, of Carbon, initiated by the Alpha Chapter at the University of Oklahoma, and John Stewart, of Calgary, initiated by the Beta chapter at the University of Tulsa, Oklahoma.

Considerable building is going on in Carbon, with Syd Wright erecting an addition to Wright Motors and Bob Shaw and Alf Holwick building garages.

Mary Grannan is children's radio personality with fans from six to sixty miles east to coast. Just Mary and Maggie Muggins, two of her program-creations, have become institutions of national renown. They are heard on the Trans-Canada network. They are Just Mary on Sundays and Maggie Muggins on Wednesdays.

it's a good idea
to have a choice

SUPPOSE you have what you feel is a good opportunity which calls for bank credit. If one bank cannot see it your way, or if you think you can get a better deal elsewhere, you're free to "shop around".

Banks compete to serve the most diversified needs, no matter how specialized any of them may be . . . personal, business, or farm loans, money transfers, collections — to name just a few.

More than 95 out of 100 bank loan applications are decided "right in the field" — in the branches — by bank managers who take a personal interest in serving their customers' individual requirements.

Exchange Of Ideas

ALTHOUGH TWO PROBLEMS are very rarely identical it is often helpful for those engaged in similar undertakings to exchange information and ideas regarding their work. Progress in many fields is accelerated in this way and mutual respect and understanding between the two organizations prevent the free exchange of facts concerning new developments. In farming we have many problems which Canadian agricultural scientists are trying to solve, and in this, as in many other matters, it is always interesting to learn what is being done in other countries and whether we are making greater or less progress than those who have similar difficulties to overcome.

Could Compare Farm Problems

Recently Dr. E. S. Archibald, director of federal experimental farms, returned from New Zealand, where he had spent three months. He has written a report on some of the problems which Canadian agriculturists are now studying. Dr. Archibald visited the sister commonwealth as a member of the Canadian delegation to Pacific Science Congress and during his journey he had the opportunity of visiting the methods used in New Zealand against the bollworm, master which is one of great concern to all countries in which there are extensive farming operations. He also visited experimental stations throughout the country and had the opportunity of comparing them with those in Canada.

In returning to his journey and to what he had seen in New Zealand, Dr. Archibald reported that that country has more favorable climatic conditions, giving most farmers there the advantage of year-round growth with considerably greater rainfall, better fat per acre than we have in Canada. He also said, however, that "research and experiment will make an immense contribution to Canadian agricultural prosperity through the improvement of the natural soil conserving food grass." No doubt the facts brought back by the scientists who visited New Zealand will be of interest to research workers in our turn. It is the task of the government of interest to research workers to study such exchange of ideas on problems common to both countries, should prove of great mutual benefit.

DOES INDIGESTION WALLOP YOU BELOW THE BELT?

Help Your Fortune "25" For The Kind Of Relief That Helps You!

Most half of your digestion is done below the belt—in 25 feet of bowel. That's why you feel uncomfortable after dinner. That's why you have indigestion.

The Journal said scientific knowledge denies the common belief that children of tubercular parents inherit susceptibility to the disease and can have it in any part of the body.

The Journal said scientific knowledge denies the common belief that children of tubercular parents inherit susceptibility to the disease and can have it in any part of the body.

The Journal said children with tuberculosis are more likely to contract the disease than other children if they stay in contact with infected persons.

"The entire problem resolves itself into one of infection with tubercle bacilli, which usually occurs after birth," the Journal said.

T.B. Comes From Infection

CHICAGO.—Tuberculosis in children of tubercular parents comes from the same cause as in adults—hereditary weakness. The Journal of the American Medical Association said.

The Journal said scientific knowledge denies the common belief that children of tubercular parents inherit susceptibility to the disease and can have it in any part of the body.

The Journal said children with tuberculosis are more likely to contract the disease than other children if they stay in contact with infected persons.

"The entire problem resolves itself into one of infection with tubercle bacilli, which usually occurs after birth," the Journal said.

THIS IS THE FISH CAUGHT THE MAN

PORT PIERCE, Fla.—A fisherman who had been fishing all day at the pier caught a big jewfish while angling from a bridge.

The fish put up such a fight that he had to use a spear. But it was a mighty jerk.

Hill went over the rail into the water and clung to the pier's bridge structure until other fishermen helped him to safety. The fish also got away.

RURAL CORRESPONDENT: COMMUNITY SECRETARY

"A good newspaper correspondent is a valuable asset to any community."

"A community ought to, and I'm sure does, appreciate the work of a good community correspondent."

"She puts her heart into the activities of the people and, in the intimate columns of the county paper, gives recognition where it is due," James Frith.

"Where does the cow think she is?"

He will just as soon as the sheriff can lay hands on him.

It takes more than a ton of coal to make a ton of steel.

First Field Day At Mission

The first field day of Mission and District Juniors was recently held at the F. G. Verchere farm, Mission, B.C., with members of the local Swine, Potato and Poultry clubs participating. Despite the downpour D. B. Feldman continued his lecture to give his lecture on how to judge a class of market hogs at Mission, B.C., and District's first Field Day. The group includes members of the local Potato, Swine and Poultry clubs.

FUNNY And OTHERWISE

The class had received a lesson on trichinosis.

"Now, Johnny," said the teacher, "can you tell me what a trichinosis is?"

Johnny thought hard, then a light shone in his eyes.

"Yes, teacher, a female goat."

Old Lady "D" goes when they smoke."

"Old Lady" is the name of a goat.

The teacher said scientific knowledge denies the common belief that children of tubercular parents inherit susceptibility to the disease and can have it in any part of the body.

The Journal said scientific knowledge denies the common belief that children of tubercular parents inherit susceptibility to the disease and can have it in any part of the body.

The Journal said children with tuberculosis are more likely to contract the disease than other children if they stay in contact with infected persons.

"The entire problem resolves itself into one of infection with tubercle bacilli, which usually occurs after birth," the Journal said.

Many Years To Pass

Voyage To Moon Possible, But Space-Ship Building Difficult

WASHINGTON.—A space-ship can be built. A sort of model-T version can be built with technical data available today. But the consensus is that a great deal is going to happen and many years will pass before anybody tries it. By a space-ship is meant a projectile or vehicle that would operate outside the earth's atmosphere and at least partly free of the earth's gravitational pull.

The main problem disturbing the national military establishment is not whether a space-ship is possible but what purpose it would serve and whether it would be worth the tremendous cost.

James Forrestal, former defense secretary, elaborated his views on the subject last Dec. 29 that his department was studying "earth satellite vehicles"—actually the lowest level of the space-ship concept. But the fuel question alone shows what the engineers think of speed of exhaust gases—in rocket motors used today is about 7,000 feet per second. But escape-gravity velocity is close to 25,000 feet per second.

So, according to G. Edward Pendray in *The Coming Age of Rocket Power*, the stage of development required for a moon-trip. If the final stage—that which reaches the moon—carries even 100 pounds of payload, the weight of the fuel of the rocket would have to be 26,566 tons.

If velocities of 10,000 feet per second can be achieved with chemical fuel, it may require a four-stage rocket carrying five tons of payload, plus 50 tons of fuel, to land on the moon.

Dr. Luis Alvarez, noted American physicist, says that if atomic driven spaceships are built, "it will be only after extensive basic research that the difficulties of using atomic energy in the impossibility of getting rid of heat will be overcome."

Space travel enthusiasts dream in terms of four types of vehicles:

1. A satellite, a unmanned rocket fired into the air with enough power to attain 18,000 miles an hour—this would come to a "stop" several hundred miles above the earth in an elliptical pattern. Perhaps it could serve as a television relay station or a communications gadget.

This could be achieved in the same manner that a combination rocket was launched to 250 miles recently. But four times the speed would be required.

2. Space Station. A greater speed might be needed to get a satellite into a true space orbit. It would revolve about the earth like the moon. Here could be an observatory for the astrophysicist, a communications platform from which to "dominate the earth."

A ship that could escape the pull of gravity. This is the legendary "voyage to the moon" rocket. This ship would have to reach a speed of 20,000 miles an hour, or 36,000 feet per second to thwart all earthly gravitational pull.

4. A ship that could escape the solar system. Not much is known about this one. But it would have to travel 28,000 miles an hour, theoretically.

Name Streets For Canada

BEXHILL-ON-SEA, Sussex, England.—A tribute was paid to Canadian troops stationed here during the war by naming a street after them. The street is now officially named.

They will be called "Canada Way," "Highlanders' Walk," "Saskatoon Road" and "Calgary Road."

Muslin was imported into England from India in the late 1600's.

: STAMP CORNER :

By JAMES MONTAGNE

Austin has issued a colorful set of stamps for child welfare, for birthday, Easter, Christmas and St. Nicholas' day. Set left to right, for birthday, Easter, Christmas and St. Nicholas' day.

A press dispatch on May 9 told of the death of Prince Louis II of Monaco, the last of the ruling Grimaldi dynasty. The principality, best known for the gambling casino of Monte Carlo, Prince Louis was well known as a stamp collector. His portrait has been featured on his photographs since 1923. His successor, grandson Prince Rainier, 29, is shown on a set of four that have been put on stamp.

French financial advantages for stamp collectors from the country would help boost its finances, for there were many colorful sets issued by Monaco since 1923.

These sets have been in albums collecting the world over, and have brought considerable sums. Prince Rainier, 29, had been few stamp issues in Monaco.

The first stamp appeared in 1855, featuring Prince Charles III. In 1881 he was succeeded by Prince Albert I, whose portrait then was shown on a stamp. Prince Albert I died in 1922, after showing him in naval uniform, appearing in 1922, along with the first scenic views of Monaco. The first set of Prince Louis I was issued in 1922, along with more scenic views of the principality.

This followed the next year with a set of three, featuring Prince Louis, and in 1928 with a special set for the International Philatelic Exhibition in Paris.

These sets have been in albums collecting the world over, and have brought considerable sums. Prince Rainier, 29, had been few stamp issues in Monaco.

Now portrait stamps of the prince

ONE "MONSTER" THAT DIDN'T GET AWAY!—A huge success was the fishing party to Moon River, near Parry Sound, Ont., of these four men. Al Norgood and George Steely, of Buffalo, N.Y., and Bert Wood, and Tom Lefebvre, of Sudbury, Ont., landed 44 pickerel and this monster of a 125-pound sturgeon. The large job was caught by accident when hooked by the tail. It was landed with a clothes line.—S.N.S. photo.

(By Francis James)

If you set about the task of redecorating your home, taking your furniture into complete consideration, the finished effect is apt to be like that of a very fat lady wearing tight slacks and high-heeled shoes. You appear as a weird, unbalanced figure, out of place, out of place against the wristy pallor that lends such charm to simple traditional furniture or the quiet dignity of well-set period pieces. In the solid room you need a solid background, and the paneling, however plain, will provide the correct wallpaper background and heavy draperies in rich solid colors which will blend the scheme and the spirit of the room.

When you re-decorate a room you must consider what you already have—and build from there. With

the background that complements your furniture, you can bring a room to life.

When you redecorate, you should blend the entire room into one integral idea. This blending process will enhance the loveliness of the polished wood.

For frail or dainty traditional pieces, on the other hand, you should establish a feeling of charming informality. Stay away from heavy solid patterns in wallpaper and draperies. Pastels make the best backdrop for these types of traditional pieces.

Pale yellow-green, pale blue and pale all good wallpaper colors. And for draperies, a cool, loosely patterned cotton cloth to blend with the overall scheme will best match the spirit of the room.

The kind of room that is popular should be stately and sedate with the background of neutral mushroom, warm beige or sand tones. Draperies should be heavy and full, and should blend the entire room into one integral idea. This blending process will enhance the loveliness of the polished wood.

For frail or dainty traditional pieces, on the other hand, you should establish a feeling of charming informality. Stay away from heavy solid patterns in wallpaper and draperies.

Pastels make the best backdrop for these types of traditional pieces.

Pale yellow-green, pale blue and pale all good wallpaper colors. And for draperies, a cool, loosely patterned cotton cloth to blend with the overall scheme will best match the spirit of the room.

The kind of room that is popular should be stately and sedate with the background of neutral mushroom, warm beige or sand tones. Draperies should be heavy and full, and should blend the entire room into one integral idea. This blending process will enhance the loveliness of the polished wood.

For frail or dainty traditional pieces, on the other hand, you should establish a feeling of charming informality. Stay away from heavy solid patterns in wallpaper and draperies.

Pastels make the best backdrop for these types of traditional pieces.

Pale yellow-green, pale blue and pale all good wallpaper colors. And for draperies, a cool, loosely patterned cotton cloth to blend with the overall scheme will best match the spirit of the room.

World News In Pictures

GOOD AND BAD HAWKS — The majority of farmers say a good hawk is a dead hawk. This theory has been based on the behaviour of the three "bad boys" of the hawk clan—the Goshawk, Coopers Hawk and the Red-tailed Hawk. These three have furthered the farmer's cause by preying on the greater majority of them live on rabbits, rats, mice and insects, which in turn are true enemies of the farmer. The Marsh Hawk has good and bad habits; the Red-tailed Hawk balances the scale, slightly on the good side.

while the Broad-winged Hawk, Rough-legged Hawk and the Red-shouldered Hawk are almost entirely beneficial. Pictured above are left to right: A Red-tailed Hawk stands over a dead chick it has just plucked; a Red-tailed Hawk is perched on a post-tail; Hawk just after leaving nest; a Rough-legged Hawk near time of leaving nests; young Sparrow Hawk at the door of his home—a Flicker's hole.

FROM HER ROYAL HIGHNESS—A ROSETTE — Princess Elizabeth has been presented with a rosette by Mrs. J. C. Lister, rider of Moonstones who was reserve champion in the hunter class at the Royal Horse show held in the home park of Windsor Castle, recently. Her royal highness was accompanied to the show by her consort, Prince Philip, Duke of Edinburgh.—S.N.S. photo.

ALBERTA HAS WORST FIRE IN ITS HISTORY — The worst in history, which has raged in Alberta, officially, since the Great Fire of 1912, has destroyed homes and hundreds of people as it travels through the forests left dry by one of the most rainless springs in the province's history.

Red Cross workers from Edmonton, shown, have been working desperately to feed, clothe and give other aid to fire victims. Here they hand out clothing, blankets and other necessities to the refugees.—S.N.S. photo.

WAR ORPHANS ARRIVE AT NEW HOME — Happy to be in Canada are these European war orphans who now are guests at the spacious Mount Mary Immaculate orphanage at Ancaster, Ont. They received a warm greeting from children at the home who donned their best clothes to welcome their new friends. The little girl in front, received a bouquet of lilies. Asked personally by Pope Pius XII to find foster homes for displaced Catholic orphans, Cardinal James McGuigan was on hand to welcome children to Canada.—S.N.S. photo.

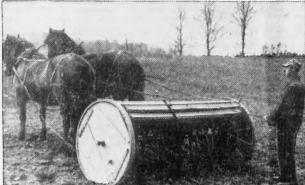

WEDDING COST \$100,000 — Montreal's most expensive wedding ceremony, said to have cost \$100,000, last week was that of Miss Elizabeth, shown, daughter of the president of Canadian Diamond, who was married to Mr. L. L. Abbott of Paris and New York. Flowers, flown by chartered plane, included \$5,000 Essex County lilies.—S.N.S. photo.

WOLVES, BEWARE! — Miss Elizabeth, shown, is afraid of wolves? Not one according to Canadian fashion models who are unanimous in saying the only girls who are harassed by wolf calls are those who want to be. But just in case, this petite miss is prepared for the worst. And underneath those booted garters are brass knuckles.—S.N.S. photo.

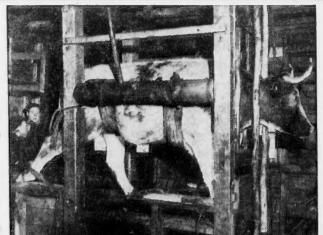

FUR TRADE DOWN — The bottom has fallen out of the trapping trade in the northern Manitoba outpost of Churchill. Veterans of the trapline have been forced to turn to other jobs, holding that trapping no longer is profitable venturing because of the combination of low fur prices and high cost of living. Art A. Anderson, fur buyer, says that five fox skins will bring him only \$1.50 for a red fox pelt. This year prices ranged from 75 cents to \$3. Gut of the fur is worth 10 cents and the royalty of 25 cents. Fox pelts (such as those pictured here) are selling cheaply.—S.N.S. photo.

STOPPED THE WIND — To stop the wind from blowing his clover and timothy seed heller-skeleter, Gordon Woolffe fastened cardboard strips to his seed drill's spokes. He is shown sowing Ajax oats at his farm near Willingdon, Ont., although the day was windy, the clover seed had become as dense as the Ajax.

ALBERT TAYLOR — Albert Taylor, 12, is a boy who has been the target of a bear attack in Highland Creek bushland near Toronto. On the way to school he disappeared as quickly as it came. A thorough search of the area brought no trace of the bear. Like the preacher in the song, Albert Taylor went up a tree when he saw the bear. "It was this big and all black," he reports. A school chum also saw the animal and footprints were found.—S.N.S. photo

THE ADVANTAGE OF OXEN — If oxen keep the traditional Land of Evangeline alive, the Nova Scotian farmer that drives them is not too concerned with history. He has his own reasons for sticking to the plodding animals. The cost of raising a team of oxen is about \$100 a year, while he would have to pay for two teams of horses or a small tractor. Working even at a walk, the team can pull a load of 1,500 pounds. Working at a trot, fastening the load, they can be filled with pulling big timber to the stock pile. (lower picture), is another job which oxen do well.

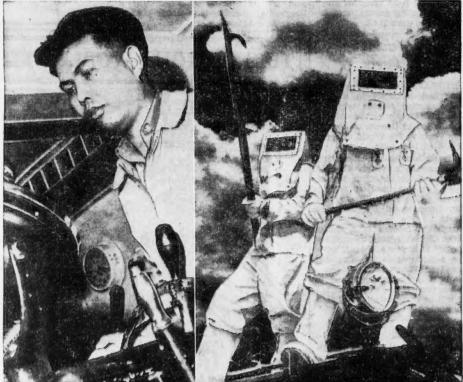

INGENIOUS DEVICES FOR SAFE-CRACKERS — Lined up behind an array of safe-cracking equipment are four young men who were arrested by New York police as they were attempting to break into two offices in the Times Square area. Four devices for checking a safe were found in the search of the two men, the greatest being a wire which was wound around acetylene containers exploded in their faces. Pictured, (left to right), are: Alvin Karpis, Michael Karpis, Marvin Coffman, age 20, and Harry Karpis, alias Mastermind, 21. Karpis said the quartet had all their possessions at a walkie talkie radio set, acetylene torches, two containers of oxyacetylene gas and other cutting tools.—S.N.S. photo.

Value Of International Co-operation Shown In U.N.'s Maritime Activities

A network of United Nations weather ships, painted white, sail the North Atlantic Ocean routes, collects meteorological data by means of instrument-carrying balloons which automatically relay information to the weather ships. This vital data is then transmitted by radio to planes and ships. A number of nations take part in the operation of this aid to navigation.—Central Press Canadian.

Chinese helmsman, (left), approaching a foreign port, is guided by light messages relayed to him by a lookout. There were no veterans heard when the United Nations formed the Inter-American Maritime Organization. One of the first acts of the organization was to adopt a resolution that nations must have foundations which develop such safety features as this strange-looking asbestos under control.

A field as old as man's spirit of co-operation among nations is now coming into its own. The U.N. Maritime Conference, which met at Geneva in February and March last year, established IMO (International Maritime Organization), which will join the ranks of U.N. Specialized Agencies. As far as the world comes formally into being, its task will be to promote higher standards of maritime safety and efficiency of navigation and port services.

Two recent international conferences, one in London, The U.N. Maritime Conference, which met at Geneva in February and March last year, established IMO (international Maritime Organization), which will join the ranks of U.N. Specialized Agencies. As far as the world comes formally into being, its task will be to promote higher standards of maritime safety and efficiency of navigation and port services.

Maritime co-operation among nations did not, of course, begin with the U.N. Faced with the perils of the sea, the world has always had a need for common action. Beacons sprang up all over the world to mark port waters, shorelines and harbors, and today the globe is dotted with over 37,000 lighthouses. Between the ancient Lighthouse of Alexandria, one of the seven wonders of the world, and the helicopter patrol of today, lies a story of practical and effective

Helpful Hints

If curtains are to be starched, it's a good idea to have all the curtains from one room in starch at the same time so that you get an equal amount of crispness in the fabric.

An economical and good-tasting sauce for fish cakes is easily made by adding a generous amount of onion to the cream sauce to pass a few drops of lemon juice over the top.

Pasteurized Milk Is Safe.

FAREWELL TO BERLIN — His face working with emotion, Gen. Lucius D. Clay, U.S. military governor of Germany, salutes his replacement, as shown as he addressed the people of Berlin, assuring them for the last time, "Berlin will be free." Behind him, weeping back tears, he praised Berlin and its people for their endurance and courage in adversity during their quest for freedom and democracy. Credited with the ending of the cold war by initiating the air lift which defeated the Berlin blockade, General Clay is ready left Berlin and is back in Washington, D.C., where he was given a hero's welcome.—S.N.S. photo.

The board rejected 1,121 applications in the six months ended last

Many Canadians Try To Travel In U.S. On "Health Travel" Permits

(By The Canadian Press)

Thousands of Canadians—undesirables or sick try to travel to the U.S. more than the \$150 yearly the Foreign Exchange Control Board allows for travel in the United States, usually they don't succeed.

Officials of the board said in an interview that the task of sorting through the thousands of "health travel" applications is a "thankless job." Between 20 and 100 applications are received daily for health travel in the United States.

The board rejected 1,121 applica-

tions in the six months ended last March, sometimes expending accusations of "interfering with personal liberty." The rejections meant a saving of \$100,000 in hard-to-get American dollars.

At the same time the board grant-
ed 1,000 permits for health travel, allowing the ill to take \$6-\$800,000 out of the country.

Covering all phases of American travel, the permits are issued for other reasons—the board issued permits for about \$80,000 during

Some of the aliments put forward for additional money range from the simple to the sublime.

In one case, of Toronto, head of the division for individual exchange applications, recalled with a laugh that a lot of people claim "business" as a reason for getting Canadian funds.

Others are those who claim hardness and still others with just common colds who feel they must get into a better climate—preferably a trip to the sun-drenched state of Florida or California.

Application for additional travel funds are suspended. They come from all kinds of people and from all kinds of people.

The stream of applications reaches a head after the yule-tide season. "There is a great increase," said Mr. Holloway, "of having little to do and industrial people would like to get away until the busy East Coast shipping season begins."

There are others—such as well-to-do farmers or the like who like to travel to the West and suddenly develop a kink or a cough which they cite as grounds for obtaining U.S. funds for travel below the border.

Legitimate cases can also get the board's best consideration. Some receive as much as \$12,000 for a five-month vacation, others for a two-month period in the upper brackets of society ask for or get about \$1,500.

Their ailments include the entire field—from cancer to bronchitis.

Few persons more than 65 are turned away because they can show any debility or chronic condition which would warrant a change in climate.

To ensure a thorough probe of all applicants, the board applies this method:

1. An application for additional travel funds is received by a chartered bank, who sends it to the F.E.C.B.

2. The applicant's doctor is asked to supply a medical history report which is considered by government doctors in the Health Department.

3. Final consideration is given by the F.E.C.B. itself.

Then the fun starts flying. People who are rejected want to know why. They go to the F.E.C.B. The board explains. Occasionally they grant an appeal and reopen the case.

Simple As Pie

Recognizes Newspaper Advertising As A Greater Force

HAMILTON—Retailers now recognize newspaper advertising as a greater force behind sales than ever before, John Giesen, director of the Advertising Association of Canada, told a meeting of the Canadian Publishers Association's Bureau of Advertising, said.

Mrs. Giesen is one of the speakers at the annual Clinic of the International Federation of Sales and Advertising Clubs conference.

He said retailers are investing more money in the medium which produced sales. He saw a lot of advertising at the moment on retail advertising programs in newspapers.

ST. LOUIS—A chemical which was put aside immediately after its introduction because it was considered of no commercial value has been found to be an agent in killing boron.

It is 17% boron and 83% organic plants, it was announced by the Monsanto Chemical Company. The poison, known as 2,4,5-T, which is short for 2,4-dichlorophenoxyacetic acid, is a hormone-type chemical.

None of the chemists who worked on 2,4,5-T know exactly why it is effective, but they believe the chemical speeds the growth of plants to the point of curtailment of plant life.

Now, however, the scientists think the chemical possibly attacks the respiratory system of the plant, thus choking or starving it.

As a pest as a plant-exterminator, 2,4,5-T is mixed in a solution with DDT or other insecticides.

It is believed that 2,4,5-T could be useful in clearing railroad rights-of-way since it destroys virtually all broad-leaved plants.

REMAIN IN AIR

When molecules of water enter the air—expanding in vapor, they remain in the air until condensed to form rain, dew, snow, or the drops of water that form on cold objects in the summer.

NIAGARA BLOSSOM QUEEN BEACHES—Carnival of Stars Queen, Miss Carolyn Abbie Burlington, Ont., in open car, was ironically, broken up by heavy traffic as people sought to see blossoms on the Niagara peninsula.—S.N.S. photo.

Only FIVE crosses to the inch! You'll finish these in gay designs in no time, and they look like gay gingham aprons!

A child can do this fun embroidery design in 100 hours; transfer of 6 motifs 5½" x 8 inches.

Our improved patterns come with easy-to-follow step-by-step photos, and complete directions—makes needle-work easy.

Smile of the Week—

Nursing Wife: "Are you sure you love me when I am old and ugly?"

Husband (bursting up and snapping): "We say I don't."

OUR COMPLETE SHORT STORY

THE LETTER TO LESTER ::

By WALTER DESMOND BOOTH

MISS SARA WORTHY was very old, and, though it was hard to tell that she still lived, she had been failing most of her life, but she had been fortunate in having her only sister, Alice, to care for her. Neither had married, and had grown old together in the rambling house their father had left them 50 years before. As Alice grew older, she had to go aside she turned over in her mind the tangled events of their lives. She made up her mind to leave. She threw off a burden she had borne all these years. Not that it would matter now, but her conscience would at least rest.

Miss Alice laid a hand on her sister's arm. "Sara," she said softly. "Sara turned her head slowly and looked at her. "I have a secret. I am strong enough to listen to it."

"It's quite strong now, Alice." "I don't know how to start, and it isn't a very good time to bring up the subject at all, but I can't wait any longer. Nineteen years ago next month you were supposed to be married to Lester. Sara, when we last saw each other, he had just come home from the war, and he had a little speech blemish, and what was it all about? Oh, yes, it was about whether or not you would live with him. I don't know if you don't know whether the quarrel was worth what you two put it into but he left for a while, and then you would never hear from him again until he heard the right word from Lester. Lester was awfully prideful."

She stopped again, and then continued. "Three days later you wrote him a letter. I don't know what you said, but that you wanted me to make it. I guess you did that," she said.

Miss Sara lay her head柔弱地. Miss Alice pushed on. "Not now, Sara. Let me finish. As I was saying, you wrote a letter to Lester. You can guess that you never wanted your secret known, so you walked away with you to mail it. Do you remember that you asked me to go, Sara?" She tried again to stop, but Lester again Alice stopped her. "No, wait, Sara. My turn." She began slowly again. "I saw you mail the letter, Sara. You were quiet, but she lowered her voice, "you never did hear from him." The tragedy of it all, the love hung heavy over the sick bed.

"Sara, you can mail your letter, but I saw, too, that you were going to add more. I let you forget it, Sara. Did you understand what that?"

If Everyone

If everyone who drives a car. Could be a man in bed. With broken bones and stitched wounds.

Or, if everyone who drives a car. And then endures the agonies. That many people do.

Or, if everyone who drives a car. Safety knowing what took place.

The laws and rules of traffic. That many people do.

If everyone could stand beside. The wife and children left behind.

And the ones who drive a car. Before that fatal end.

And see the ones who drive a car. Never knowing what took place.

The laws and rules of traffic. That many people do.

If everyone could meet. The wife and children left behind.

And the ones who drive a car. Where once the sunlight shone.

Before that fatal end.

And look upon "The Vacant Chair".

What a waste of life.

I'm sure each reckless driver.

Would be forced to think a bit.

If everyone could stand beside.

The wife and children left behind.

And the ones who drive a car.

Where once the sunlight shone.

Before that fatal end.

And see the ones who drive a car.

Never knowing what took place.

The laws and rules of traffic.

That many people do.

If everyone could meet.

The wife and children left behind.

And the ones who drive a car.

Where once the sunlight shone.

Before that fatal end.

And look upon "The Vacant Chair".

What a waste of life.

The laws and rules of traffic.

That many people do.

If everyone could stand beside.

The wife and children left behind.

And the ones who drive a car.

Where once the sunlight shone.

Before that fatal end.

And see the ones who drive a car.

Never knowing what took place.

The laws and rules of traffic.

That many people do.

If everyone could meet.

The wife and children left behind.

And the ones who drive a car.

Where once the sunlight shone.

Before that fatal end.

And look upon "The Vacant Chair".

What a waste of life.

The laws and rules of traffic.

That many people do.

If everyone could stand beside.

The wife and children left behind.

**CHRIST CHURCH, CARBON
(Anglican)**

SUNDAY SERVICES
1st Sunday of the Month: Holy
Communion, 11:00 a.m.
2nd, 3rd and 4th Sundays: Even-
ing, 7:30 p.m.
5th Sunday: Evensong, 3:00 p.m.
REV. J. W. WAY, Vicar

**LITTLE ITEMS OF
LOCAL INTEREST**

Mr. L. Poxon and Mr. F.J. Bas-
sant attended the Henry Ford
funeral in Calgary on Monday.

Mrs. Frank Emery spent the past
week visiting friends in Drumheller.

A number of Carbon Anglican
churches participated in the Rally
Day service held at Acme last
weekend. The Dean of Calgary was the
main speaker.

Mrs. and Mrs. Dick Spyry of Cal-
gary spent the Victoria Day holiday
in Carbon, bringing Mrs. Ell Spyry
out with them. Mrs. Spyry has been
a patient in a Calgary hospital for
the past five weeks.

Mrs. Jim Cooper was a Calgary
visitor last week.

Miss Irene Andrews was a Cal-
gary visitor last week.

A heavy frost occurred in the dis-
trict last week and many residents
report having plants and gardens
frozen.

CARD OF THANKS

We wish to thank our neighbors
and the many residents of Carbon
who helped to put out the fire at
our farm Saturday night.

MR. AND MRS. LES SAUNDERS

IN MEMORIAM

In loving memory of Mother,
Mrs. Lydia Gieck, who passed away
on May 27, 1948.

Sadly missed by The Family

HIGH SCHOOL HI-LITES

The Carbon High school baseball
team and the girls' softball team were
both present at the May 24th
sports at Acme and came home
with first and second prizes respec-
tively.

The girls' softball team defeated
Acme 11-8 in the first game but in
the final went down to a 25-6 de-
feat at the hands of the Beiseker
girls. However, they brought home
the first prize money.

The boys' baseball team won its
first game against Acme (which was
not even a league game). In the sec-
ond, however, Beiseker failed to walk
off with first prize for the third
in succession.

On Thursday, May 26, the Aces
gave softball practice to Carbon
and defeated the local girls in
a very close game, the final
score being 13-12.

**BASEBALL LEAGUE FORMED;
FIVE TEAMS ENTERED**

A baseball league recently formed
will consist of five teams. Car-
bon, Orkney, Grainger, Bircham
and Grand Forks, and below is
the proposed schedule of games:

May 25—Carbon vs. Carbon.
Grand Forks at Orkney.

May 26—Grainger at Grand Forks.
Carbon at Bircham.

June 1—Grand Forks at Grainger.
Bircham at Orkney.

June 5—Grand Forks at Carbon.

Orkney at Bircham.

June 12—Orkney at Grand Forks.
Carbon at Grainger.

June 15—Carbon at Orkney.

June 19—Grand Forks at Bircham.
Orkney at Carbon.

June 22—Carbon at Grand Forks.
Grainger at Bircham.

June 29—Carbon at Grand Forks.
Orkney at Grainger.

Afternoon games will commence at
2 p.m. and evening games at
6 p.m.

CARD OF THANKS

I wish to thank the continuous
Association for the flowers, the
Gamble Ladies Aid for the basket
of fruit and all my friends for their
kindness during my recent illness.

MRS. ELI SPRY

**USE YOUR BONDS
TO BORROW WHEN
YOU NEED MONEY**

It's Better Business
To Report a B of M Loan
Than to Borrow Money

Like most other people, you may
sooner or later want cash in a
hurry. Whether your reason be op-
portunity or emergency, a wonder-
ful bargain or a sudden illness, you
will show your mettle by thinking
wise if it means touching your
bonds.

You can easily cash good bonds,
but when you have passed,
your bonds will be good too. It's
when many people recall the ad-
vice to buy their bonds, and when
they just say "they can't replace them
at the time being." The next day you may find them really
short of funds.

You can raise the money you
need without spending the savings
your bonds represent. At the end
of the year you can be back against
your bonds and keep your savings
intact. And you can repay the
loan out of income in easy instal-
ments.

The cost of the loan is amazingly
little . . . in fact, the interest on
your bonds practically pays for it.

If you need money for a good
purpose, drop in and see J.A. Barr,
B of M manager at Carbon or his
accountant, J.E. Adams.

Letter To The Editor

Dear Editor:

As the local representative of the
Shut-in's Day Association may I be
permitted space in your paper to
acquaint your shut-in and handi-
caped readers with this Associa-
tion which is working for their
interests. The S.I.D.A. is a non-profit
organization sponsoring Shut-in's Day,

held annually the first Sun-

day of June. This is a day set aside
to encourage the public to take
brighter and less fortunate
among us by sending a letter, card
or other token of one's thoughtful-
ness.

There are many shut-ins in Carbon
and vicinity, and I would like
to get in touch with as many as
possible so that they may learn of
the S.I.D.A. and its plans on
their behalf. If any shut-in, or for
that matter, any person interested
in the sick and disabled, would
kindly drop me a line I would be
happy to send full particulars
about the Association.

Membership is free to shut-ins
and incure no obligation whatso-
ever.

Thanking you for any considera-
tion you may care to give this
matter, I am

Your very truly,
Ms. Flora Pfeifer,
Representative,
Rosedale, Alberta.

Nowadays the electric switch
makes things go. In old days
they used the hickory switch.

**FARMERS: DON'T GAMBLE
WITH THIS YEAR'S CROP!**

Before you buy 2,4-D — Get the facts on

AGRICULTURAL**Green Cross* WEED-NO-MORE**

New! AGRICULTURAL Green Cross* has proved that cost and control is NOT THE ONLY FACTOR in
the choice of a 2,4-D product. If it can be found that other ingredients in
a 2,4-D formulation have a most important influence on the effectiveness of
the product. 2,4-D DOES NOT GO INTO THE PLANT BY ITSELF! It is
the four ingredients in Agricultural Green Cross* that make it superior
to all other 2,4-D products. Any of the listed formulations which lacked any of
these ingredients were found to be less effective than Agricultural Green Cross*.

LOWEST COST PER ACRE! It is these field-tested
ingredients in the proper proportion that make
Agricultural Green Cross* the most economical
weed killer per acre. This has been PROVED
in over 500,000 acres of grain in Canada and
the U.S.A.

**YOUR SECURITY and YOUR STABILITY
ARE AT STAKE!****You Can Defeat Your Biggest Tax Problem . . .**

That is the 8% sales tax. The one the budget missed. The one that hits you
hardest. This quotation

" . . . This tax costs the Canadian taxpayers 30 cents for
every dollar of processed material"

from a Liberal member of Parliament shows what the government is doing
to keep taxes high . . . despite the "brilliant" reductions in the budget.

So that you may have a sure, adequate income, the Progressive Conservative
Party will:

- Reduce sales taxes.
- Provide deductions to farmers for mem-
bers of family who contribute to revenue.
- End the administrative persecution of
farmers by tax collectors.
- Reduce income tax rates
and increase exemptions.

For your protection the Progressive Conservative Party
will take these steps:

PRICES

—Permanent floor price legislation based on these principles:

- A definite formula in the Farm Prices
Support Act for arriving at floor prices.
- The formula will allow for variations in
production and demand for individual
products.

EXPORT MARKETS

Restoration of the Canadian Wheat Board to serve its original purpose as a Marketing Agency
for wheat producers . . . and its extension to include the handling of coarse grains.

Inclusion of representatives of farmer's organizations on all Boards dealing with farm matters.

Aggressive and immediate action to recapture lost markets; the development of new markets;
to achieve security of export markets through foresighted negotiations.

Dominion marketing legislation based on the principle of democratic producer control.

PRODUCTION

Reclamation and conservation of existing soil resources; development of new producing lands
through irrigation; greater accessibility to domestic markets by improved transportation
facilities.
